Product Certificate

MiTek LUMBERLOK Timber Connectors

3. Description of Building Method or Product

Name of the product or method in Aotearoa New Zealand, including any brand names used. Description of what it is and the components that make up any system and its physical attributes including the materials and make-up of the product, where applicable. Matters that should be taken into account in the use or application of the building method or product can be found in item 6. Conditions and Limitations of Use. Continuation of description can be found in item 10 – Supporting Information about Description. [Delete if not applicable]. The building method's or building product's catalogue or model identification number or numbers or other unique identifiers that might be used to identify the building product or building method

MiTek LUMBERLOK Timber Connectors are a range of metal plate or wire connectors manufactured from pre-galvanised steel (Z275) coil or wire. A selection of LUMBERLOK Timber Connectors are also available in stainless steel (Grade 304-2B); refer to MiTek Structural Fixings On-site Guide 2023 for details.

4. Intended use of Building Method or Product

Intended use of the building method or product as described in the product manual and other instructional materials. A statement of the function or purpose of the building method or product. Continuation of intended use can be found in item 11 – Supporting Information about Intended use. [Delete if not applicable]

MiTek LUMBERLOK Timber Connectors are designed and manufactured to connect timber to timber, timber to concrete, timber to steel, and to provide structural support to timber construction.

5. New Zealand Building Code Provisions

The performance clauses of the New Zealand Building Code that are relevant to the intended use and with which the building method or product complies or contributes to (where used as part of a system).

How the building method or product complies or contributes can be found in item 8. Basis for Certification. Any qualifications on the extent of that compliance can be found in item 6. Conditions and limitations of use.

B1 Structure: B1.3.1, B1.3.2, B1.3.3 (b), (f), (g), (h), (q), B1.3.4

B2 Durability: B2.3.1 (a), B2.3.2 (a)

F2 Hazardous building materials: F2.3.1

This certificate is issued by an independent certification body accredited by JAS-ANZ, the product certification body appointed by the Chief Executive of the Ministry of Business, Innovation and Employment under the Building Act 2004. This certificate may only be reproduced in its entirety. It is advised to check that this certificate is currently valid and not withdrawn or suspended by referring to the Register of Product Certificates on the Building Performance website <http://www.building.govt.nz>.

6. Conditions and Limitations of Use

The building method or product's use is to be in accordance with the installation instructions and requirements against which the building method or product was assessed.

Conditions or limitations of conformity for the performance requirements the building method or product is compliant with, including any requirements for people with the qualifications and skills to install or use the building method or product, any known or demonstrated situations where the building method or product should not be used. A statement as to whether there are any matters that should be taken into account in the use or application of the building product or building method and, if so, what those matters are.

1. LUMBERLOK Timber Connectors are certified for use on buildings:
 - a) specifically structural engineering designed in accordance with Verification Method B1/VM1, and
 - b) non-specifically designed in accordance with NZS3604:2011, and
 - c) located in any exposure zone as defined in NZS3604:2011
2. LUMBERLOK Timber Connectors shall be used:
 - a) only for the purpose for which each of them is designed and manufactured (as specified in the manufacturers technical information), and
 - b) in accordance with the manufacturers LUMBERLOK Characteristic Loadings Data, April 2020 and installation manual MiTek Structural Fixings On-Site Guide 2023 <https://mitেকnz.co.nz/services/structural-fixings-on-site-guide/>

7. Health and Safety Information

Health, safety, and well-being declarations associated with installation, maintenance, and use of the building method or product, and their specific editions and dates necessary to ensure the performance requirements of clauses F1 to F9 of the Building Code can be met.

The compliance with any manufacturer's installation instructions, maintenance, OH & S statements, MSDS's and other Health and Safety declarations will provide the necessary Health and Safety Information pertaining to the product.

8. Basis for Certification

How the performance requirements in the Building Code were met for each of the provisions. Where used as part of a system, the specific contribution to compliance.

- B1 Structure - By testing and comparison with Verification Method B1/VM1 and referenced Standard NZS3604:2011
B2 Durability - By testing and comparison with B2/VM1 and referenced Standard NZS3604:2011
F2 Hazardous building materials - By comparison with the performance requirements of Building Code clause F2.3.1

This certificate is issued by an independent certification body accredited by JAS-ANZ, the product certification body appointed by the Chief Executive of the Ministry of Business, Innovation and Employment under the Building Act 2004. This certificate may only be reproduced in its entirety. It is advised to check that this certificate is currently valid and not withdrawn or suspended by referring to the Register of Product Certificates on the Building Performance website <http://www.building.govt.nz>.
